

The diagram illustrates a super-resolution process flow. It consists of three main components arranged horizontally. On the left, a dashed rectangular box contains three overlapping rectangles of increasing size, with the text 'Кадры с низким разрешением' (Frames with low resolution) centered within them. An arrow points from this box to a central solid rectangular box containing the text 'Методы суперразрешения' (Super-resolution methods). Another arrow points from this central box to a third dashed rectangular box on the right, which also contains three overlapping rectangles of increasing size, with the text 'Кадры с высоким разрешением' (Frames with high resolution) centered within them.

Кадры с низким разрешением

Методы  
суперразрешения

Кадры с высоким разрешением
